NO.4 A user enabled for Vault Cache is unable to retrieve some archived items while disconnected from the network. Which Vault Cache policy setting causes this behavior?

- A. Offline store required
- B. Manual archive inserts
- C. Preemptive archiving in advance
- D. Store only items that user opens

Answer: D

NO.5 An organization's eDiscovery Team finds that users are auto-archiving emails to a PST file in Outlook to prevent items from being archived based on corporate policies. For security reasons, the policy states that no historical data can be stored on user systems. The eDiscovery Team requires that these items are archived using Symantec Enterprise Vault 10.0 for Exchange (EV). How should this be accomplished?

- A. The administrator should enable Client-Driven Migration to capture the contents of the PST files.
- B. End users should open the PST files within Outlook so that EV will archive them on the next archiving run.
- C. The administrator should set up Journaling to secure a copy of the data from the PST files to the EV server.
- D. End users should copy the contents of the PST files to their mailboxes to allow EV to archive them

on the next archiving run.

Answer: A

NO.6 What must be run to initiate a failover in a building blocks environment?

- A. Global Cluster Option
- B. Getting Started Wizard
- C. Convert to Cluster Wizard
- D. Update Service Locations

Answer: D

NO.7 An organization requires that all archive-enabled users are activated for Vault Cache and Use Cached Exchange Mode is unmarked in Outlook. Which configuration changes does the administrator need to perform to achieve this? (Select two.)

- A. change the default setting for Offline Store Required in the Desktop policy, Vault Cache tab
- B. select the Option Make Vault Cache available for users in the Desktop policy, Advanced Settings list, Vault Cache
- C. change the default setting for Offline Store Required in the Desktop policy, Advanced Settings list, Vault Cache
- D. select the Option Make Vault Cache available for users in the Desktop policy, Vault Cache tab
- E. change the default setting for Outlook Add-in Behavior in the Desktop policy, Outlook tab

Answer: C,D
